<b>Environmental Protection:</b>	
Any acceptable	
Basic Material:	
Nickel-chromium alloy	
Content Within Each Unit F	Package:
5 lb	
Criticality Code Justification	on:
Feat	
Special Features:	
Unit package type is contained	er; a fine chromium alloy developed to produce dense, clean bright coatings; a coarse cut of powder is utilized
to permit build-up of coatings	s as thick as 0.050to 0.100 inches; coatings are bright and resistant to oxidation and corrosion; useful for heat
resistance; easily machined	with all grades of cutting tools; certification: pwa 1315
Shelf Life:	
N/a	
Unit Of Measure:	
Demilitarization:	
No
