Environmental Protection:

Corrosion resistant

Basic Material:

Polyester

Content Within Each Unit Package:

5 lb

Special Features:

Nsn is used to purchase a of 20containers to a of 59 containers; -125+45 um (-120+325 mesh); certification msrr 9507/64, pwa 36097 and technetics rm-1050; r15y 35+/- 10 hardness; texture/finish as-sprayed 600-900; aromatic polyester powder.Produces a low-friction, self-lubricating coatings suitable for light compressive loads.Coatings can be machined to size. Service temperature is 617deg (f)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
