Basic Material:

Nickel

Content Within Each Unit Package:

12.5lbs

Special Features:

Nsn used to purchase a of 160 containers and up; certification pwa 1352-1; nickel-graphite composite coatings depend upon application techniques and intended use; readily finished with high speed steel or carbide tools; material normally sprayed utilizing oxy-acetylene equipment; composite powder of graphite 25% clad with 75% pure nickel shell; produces clearances control coatings suitable for use in compressor sections of aircraft jet engines. Useful to 900deg (f). More abrasable but less erosion resistant than pac140

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
