Basic Material:

Ceramic

Content Within Each Unit Package:

12.5lbs

Special Features:

Nsn used to purchase a of 160 containers and up; certification; certification ge a50tf87 class a, pwa 1311 and rr 9507/36; rc 50-60 hardness; 5000 psi strength; grind only. Use silicon carbide or diamond wheels; grey alumina powder 2.5% titanium dioxide w/smaller %(s) of other oxides used to toughen grain. Coatings are hard, dense and resistant to both heat and wear. Recommended for resistance to cavitation and abrasion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
