Basic Material:

Cobalt and chromium and molybdenum

Content Within Each Unit Package:

12.5lbs

Special Features:

Nsn used to purchase a of 3 containrs to a of 7 containers; certification ge b50tf190 class a; rc 46 hardness; 6000 psi strength; machines readily with silicon-carbide tools.Has lower chromium and higher silicon content, better suited to withstand hostile oxidation and hot corrosion environments up to 1750deg (f)

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
