**Basic Material:**

Cobalt and chromium and molybdenum

**Content Within Each Unit Package:**

12.5lbs

**Special Features:**

Nsn used to purchase a of 160 containers and up; certification ge b50tf190 class a; rc 46 hardness; 6000 psi strength; machines readily with silicon-carbide tools.Has lower chromium and higher silicon content, better suited to withstand hostile oxidation and hot corrosion environments up up to 1750deg (f)

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T166-s
