Basic Material:

Magnesium

Content Within Each Unit Package:

12.5lbs

Special Features:

Nsn used to purchase a of 160 containers and up; certification pwa 1333, ge a50f155 and rr 9507/21; rc 30-35 hardness; 1200 psi strength; grind only, use silicon carbide or diamond wheels. Magnesium stabilized zirconium oxide powder, widely used in aircraft engine industry for thermal barrier coatings. Outstanding resistance to thermal shock and particle erosion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
