Basic Material:

Nickel and aluminum

Content Within Each Unit Package:

12.5lbs

Special Features:

Nsn used to purchase a of 8 containrs to a of 15containers; certification pwa 1321, avco m 3952a, ge b50tf33 and rr 9507/4; rb 70-80 hardness; 2500 psi strength for smooth surfaces and 5000 psi strength for roughened surfaces; coarse as sprayed, ground good; nickel clad aluminum composite powder. Reacts exothermically during spraying to form metallurgical bonds with all substrates except copper and its alloys. Coatings are tight, dense; resistant to temperatures to 1800deg (f), thermal shock and erosion

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-s
