**Basic Material:**

Nickel-chromium alloy and aluminum alloy

**Content Within Each Unit Package:**

12.5lbs

**Special Features:**

Nsn used to purchase a of 1 container to a of 2 containers; certification ge b50tf192 class a, ge b50tf162 class a, msrr 9507/48, and garrett 52432 xxi; rb 85 hardness; 5500 psi strength; wet grind with silicon-carbide wheels; nickel-chromium-aluminum-yttrium alloys that provides outstanding resistance to oxidation and corrosion resistance in environments up to 1800deg (f). Materials used primarily used for bond-coats in thermal barrier coatings and also show promising results in protecting boiler tube walls from corrosion and sulfidation/oxidation

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T166-s
