## NSN 3439-01-477-8436

Metallic Overlay Welding Powder - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/3439-01-477-8436

**Basic Material:** 

Nickel-chromium alloy and aluminum alloy

**Content Within Each Unit Package:** 

12.5lbs

## **Special Features:**

Nsn used to purchase a of 16containrs to a of 39containers; certification ge b50tf192 class a, ge b50tf162 class a, msrr 9507/48 and garrett 52432 xxi; rb 85 hardness; 5500 psi strength; wet grind w/silicon-carbide wheel; nickel-chrominum-alunimum-yttrium alloys that provide outstanding resistance to oxidation and corrosion resistance in environments up to 1800deg (f). Used primarily for bond-coats in thermal barrier coatings and also promising results in protecting boiler tube walls from corrosion and sulfidation/oxidation

Shelf Life:

N/a

**Unit Of Measure:** 

--

**Demilitarization:** 

No

Fiig:

T166-s
