Environmental Protection:

Any acceptable

Basic Material:

Iron and aluminum and nickel

Content Within Each Unit Package:

5.0lbs

Special Features:

Nsn is used to purchase a of 60 containers and up; fe 38ni 10al, clad; -125+45 um (-120 mesh +325 mesh); rb 80 +5 hardness; texture/finish as-sprayed 400-800, machined 20-40; coating numbers p542-10 and t452-10; self-bonding nickel-iron aluminum composite. Produces coatings which not only have the excellent self-bonding properties of metco 450 but also provide a significant improvement in machinability, wear and oxidation resistance. Coatings are dense and can be used for oxidation resistant applications up to 1500deg (f). A good undercoat for ceramic, nickel chromium and stainless steel type coatings in this environment

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:
