**Chemical Composition Percentage:**

Silver 50, zinc 15.5, cadmium 16, copper 15.5, nickel 3.0

**Special Features:**

Form of wire, rod, sheet, strip, foil, pig, powder, shot, chips, viscous mixture of powder; yellow white color; approximate solidus temperature 1170 degrees f; liquidus temperature 1270- degrees f

**Precious Material:**

Silver

**Specification Data:**

81343-ams4771h professional/industrial association specification

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T166-b
