Material:

Nickel alloy and copper

General Description:

Material also includes boron, low carbon; form of wire, rod, strip, foil, powder, viscous mixture; approximate solidus temperature of 1790 degrees f; liquidus temperature of 1970 degrees f

Specification Data:

81343-ams4776f professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
