Chemical Composition Percentage:

Silver 45; cadmium 24; zinc 16; cooper 15

Special Features:

Form of wire, rod, sheet, strip, foil, pig, powder, shot, chips, and viscous mixture of powder; yellow white color; warning label to read contains cadmium poisonous fumes and gases may be formed on heating; solidus temperature of approximately 1125 degrees f; approximately liquidus temperature of 1145 degrees f

Precious Material:

Silver

Specification Data:

81343-ams4769f professional/industrial association specification

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-b
