Physical Form:

Paste

Specific Metal For Which Formulated:

Leaded alloys

Special Features:

Silver gray paste, mild odor; refrigerate at 0 to 10 degrees c; stabilize at room temp before dispensing; no clean solder paste for dispensing all types of leaded alloys; contains polymerized rosin, tin, copper, silver; hazardous disposal needed; need goggles, protective gloves, wash hands immediately; room ventilization needed; primary irritant to skin, eyes, harmful if swallowed; 10/30 cc syringes; flash pt 199 degrees f

Precious Material And Location:

Component silver

Precious Material:

Silver

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T166-s
