End Application:

Navy code llhp7a001

Physical Form:

Wire

Chemical Composition Percentage:

Tin

Wire Core Type:

Solid

Product Name:

Solder, electronic (96 to 485 degrees c)

Special Features:

Low residue flux; plastic core w/2 percent flux

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T166-c
