Shank Type:

Straight

Reamer Type:

Multiflute

Cutting Edge Tip Material:

Steel, cobalt

Special Features:

Designed for starting hole sizing where only a moderate amount of stock removal is required typically .010 to .015. used to produce holes of superior dimensional accuracy and surface finish. identification is provided by an electroetched model number and two electroetched lines. length is 7", and is cobalt material.

Material:

Steel, high speed

Material:

Steel

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T171-e
