Expansion Mandrel Set - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/3460-01-562-1057

Special Features:

Fastener size: 3/16 inch; retainer size: only mandrels are used for & oversize retainers; class of fit: class iii; length: up to 1/2 in long retainers. While all forcetec system components perform a specific function, the mandrel is the most critical. It must not only resist fracture but must maintain precise size & shape during the installion process. The mandrel, when drawn through the retainer & sleeve, expands to yield the retainer & the parent material causing residual compressive stresses.
