**Overall Length:**

2.600 inches

**Diameter:**

6.000 inches

**Operation Method:**

Impact

**Special Features:**

Item is stepped for alignment; used during maint of f100 turbofan engine to hold rotor/bearing housing assembly in vertical position during disassembly process; interfaces w/turbine portion of tpc24 pump assembly and has a half inch rubber pad on the base to cushion the fall of turbine assembly during removal maintenance

**Shape:**

Round

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T294-m
