Overall Length:

2.600 inches

Diameter:

6.000 inches

Operation Method:

Impact

Special Features:

Item is stepped for alignment; used during maint of f100 turbofan engine to hold rotor/bearing housing assembly in vertical position during disassembly process; interfaces w/turbine portion of tpc24 pump assembly and has a half inch rubber pad on the base to cushion the fall of turbine assembly during removal maintenance

Shape:

Round

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T294-m
