Prime Mover Type:

Diesel engine

Compressor Prime Mover Type:

Diesel engine

Special Features:

97% nitrogen purity, 12 standard cubic feet per minute continuous flow at regulated pressures from 50 to 4000 psig, min dew point of minus 65 degrees f; operating controls, visual pressure instrumentation and product sampling port; 400 to 600 standard cubic feet internal storage at 4000 psig with compressed air option

Supplementary Features:

Compressed air option

Reference Number Differentiating Characteristics:

As differentiated by supplemental features

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T330-b
