**Product Name:**

Oxygen generator field portable (ogfp)

**Special Features:**

Oxygen generator, field portable (ogfp) is an electronically and battery operated, small medical oxygen generator used to support the oxygen needs of casualties; ogfp supports casualty medical oxygen needs primarily as a back-up for other medical generators during movement of casualties within treatment facilities and during medical evacuation; ogfp delivers up to 93 pct medical oxygen at 3 lpm; due to its size and oxygen output, it can replace a standard size "d" oxygen cylinder; ogfp will continuously produce oxygen when connected to an electrical power source; when individual products are identified, identify whether airworthy is required or not
