General Description:

Item provides a class 100/isolated works surface which can be used with a microscope. The design isolates virtually all vibration transmissions from the filter/blower console to the surface. It maintains a class 100 environment utilizing hepa filtration. It has a solid-state speed control for adjusting airflow velocity from 40 to 110 fpm. Ave. Cfm at 90 fpm; 900; power req. 115vac, 60hz, 10, 7.5a; filtration, hepa filters (99.99% eff to .3u); dim, o/a 51"w x 65"h x 44"d; workarea, 49"w x 30"h x 24"d; weight, 590 lbs
