Product Name:

Egret high profile bed net

Special Features:

The egret (tm) high profile bed net is treated with deltamethrin and permethrin. It is simple in design, lightweight, compact, portable, allows the user to sit up on a standard or oversized cot that provides better ventilation by using a larger mesh size. It is used in areas where mosquitoes carry disease such as malaria, west nile virus, dengue fever and also where biting insects can be a nuisance. Dimensions: constructed size: 91.00 inches long;
