Product Name:

Comb, grooming, military working dog

Special Features:

The teeth shall be fabricated of stainless steel or of other metal treated for resistance to corrosion. The back and handle of the comb may be fabricated of metal or organic material. Any metal used shall be treated to resist corrosion. Any organic material used shall be non-absorbent and washable in hot, soapy water. The material shall not be biodegradable and shall not be damaged by storage at high and low temperatures. The color is optional.

Supplementary Features:

Straight, hemispherical teeth and round plastic handle

General Description:

The comb shall be designed and fabricated for separation, alignment, and smoothing of the hairs on a dog's coat, particularly after the dog has been given a bath. The comb shall be round in cross-section, and the tips of the teeth shall be rounded to minimize irritation of the dog's skin. The teeth shall extend straight out from the back of the comb, perpendicular to the handle, and shall be evenly spaced. The comb shall have between 9 and 12 teeth per inch. The tooth section of the comb shall be at least 3 inches in length, and the handle shall be at least 4 inches long. The teeth shall be of equal length and shall extend from the back of the comb for a uniform distance between 0.75 and 1.0 inch.

Specification Data:

05047-asme y14.200 professional/industrial association standard and 05047-asme y14.24 professional/industrial association standard and 05047-asme y14.34m professional/industrial association standard and 05047-asme y14.35m professional/industrial association standard

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No
