Product Name:

Comb, shedding, military working dog

Special Features:

The teeth shall be fabricated of stainless steel. The back and handle of the comb may be fabricated of metal or organic material. Any metal used shall be treated to resist corrosion. Any organic material used shall be non-absorbent and washable in hot, soapy water. The materials shall not be biodegradable and shall not be damaged by storage at high and low temperatures. The color is optional.

General Description:

The comb shall be designed and fabricated for thorough removal of dead hair from a dog's coat. The comb shall have a handle extending from, and perpendicular to, the back of the comb. The teeth of the comb shall have the form of narrow triangles joined at their basis, so that hairs are wedged together as the comb passes through them. The tips of the teeth shall be rounded in the combing direction to minimize irritation of the dog's skin. The teeth shall extend straight out from the back of the comb, perpendicular to the length of handle, and shall be evenly spaced. The comb shall have 50 to 75 teeth per inch. The toothed section of the comb shall be at least 2 inches in length, and the handle shall be at least 4 inches long. The teeth shall be of equal length and shall be 0.125 to 0.375 inch from tip to base.

Shelf Life:

N/a
