General Description:

Diesel engine driven, track mtd, revolving superstructure w/ operators cab w/ controls for all hydraulic systems, hydraulic system controls all functions, hydrostatic transmission, performs -20 degrees to 125 degrees f, swing stop device locks the superstructure in any position, w/ boom and attachments maximum reach 30 ft-max digging depth 21 ft below ground-digging reach 29 ft at ground level-dumping h 15 ft-digging range 360 degrees around excavators w/ continuous swing, attachments incl 1 trenching-1 excavating-1 dredging-1 ditching or clearing-1 concrete pouring-1 pavement removal-1 clamshell bucket and 1 single tooth ripper and 1 grading blade, lifting capacity 6850 lb, travel speed 1, 7 mph, travel in sand or gravel or loose abrasive matl, digging force 25000lb

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A23900
