Overall Length:

16.000 feet

Frame Type:

Straight

Rotating Device Type:

Roller

Center To Center Distance Between Rotating Devices:

4.000 inches

Rotating Device Diameter:

2.000 inches

Rotating Device Shape:

Cylindrical

Rotating Device Bearing Type:

Roller

Special Features:

Kit consists of mark iv series 3, box tracks with pneumatic retractable rollers; pvc air bags inside raises and lowers rollers with 30 psi air pressure; rollers lift above track .438 in.; roller width 2 in.; track width 4.5 in.; for moving palletized cargo; mounted in diamond plate; 6 tracks; width 7 ft. 5 in.; used with truck mounting instillation; kit includes air resevoir, push in couplings, regulator, automatic water drain, tubing, pressure protection valve, and control valves to suit single, double, triple or quadruple lift as required; single lever control

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T211-b
