Design Type:

Platform

Rolling Element Location:

One at each corner of chassis

Nominal length:

62.000 inches

Nominal width:

48.000 inches

Nominal height:

65.500 inches

Special Features:

Used to transport aircraft component during repair/bonding/inspection operations; b-1b aircraft age.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A500g0
