Overall Length:

2.760 inches

Overall Height:

4.190 inches

Overall Width:

0.750 inches

Attachment Method:

Bolted and hole

End Application:

Engine assembly, gas

Usage Design:

Aircraft engine accessory

Special Features:

Hpart is rectangular at the top with a slot 0.560 w x 1.250 l on center line; bottom has a 2.760 diameter cut out centered 2.810 inches from top; part is rounded off on the outside of the bottom half of this circular cutout, leaving a wall 0.750 in thick; 2 holes are drilled through from the side, one 0.342-0.352 tap drilled thru, c'bored 0.56x0.38 deep, threaded 0.3125-18unc-28 tap thru, 1.405 inch from top; the other 0.405-0.415 thru, 0.560 inch from top

Material:

Steel, astm a36

Material:

Steel, astm a36

Surface Treatment:

Nickel

Supplementary Features:

Cage calls this: link, engine lift fixture

Surface Treatment:

Nickel plated

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A30600
