Friction Lining - Page 1 of 1

View Online at https://aerobasegroup.com/nsn/3950-00-204-3337

Fabrication Method:

Molded

Width:

1.500 inches

0.188 inches

Hole Arrangement Style:

Double even

Lining Style:
Segment tapered

Minor Thickness:

Major Thickness:

0.094 inches

Arc Length: 5.188 inches

Minor Radius:

3.000 inches

Application Type:

Dry

Hole Type And Quantity:

6 counterbored

Features Provided:

Rigid friction lining

Surface Condition And Location:

One side ground

Attachment Method:

Riveted

Supplementary Features:

This item has been reviewed for asbestos material. The current approved sources 83299 have indicated thier part number contained asbestos prior to 8 4. They continue to manufacture the same part number without asbestos material after 1984

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A230a0
