**Prime Mover Quantity:**

1

**Power Drive Operating Pressure:**

90.0 pounds per square inch gage

**Prime Mover Type:**

Pneumatic motor

**Operation Method:**

Powered

**Mechanical Advantage Method:**

Crank

**Suspension Mounting Method:**

Trolley

**Cooling Method:**

Any acceptable

**Product Name:**

Chain hoist

**Special Features:**

Operation directed by a six-lever pendent control station; lift speed: 16 fpm; type traverse: sprocket drive; traverse speed: 40 fpm on level track; air consumption @90 psig at rated load and speed: hoisting - 80 cfm, traversing - 30 cfm; hoist capacity: 4000lbs.; hook type: shackle; beam width: 3.33in.; includes 530378 bumpers

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

A02800
