Fabrication Method:

Braided

Length:

600.000 feet

Overall Diameter:

0.750 inches

Environmental Protection:

Light resistant and acid resistant and chemical resistant

End Application:

Launch/retrie

Material And Location:

Polyester outer covering and fiber core

Issue Form:

Any acceptable

Length Per Weight:

0.167 feet per pound

Product Name:

V-100 vectran double braid

Special Features:

Low water absorption excellent strength to weight ratio. Melting point of polyester 480 degrees f. Vectran melting point 625 degrees f. Progressive strength loss above 430 degrees f. V-100 is a high performance double braided rope consisting of a vectran core within a polyester jacket.

Color:

Black and blue and green and red and white

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A15300
