Voltage Rating:

115.0 volts

Ambient Temp:

70.0 degrees fahrenheit

Coolant Type:

Water

Condenser Type:

Any acceptable

Outside Shell Material:

Steel

Evaporator Unit Type:

Any acceptable

Dispensing Method:

Automatic

Integral Storage Bin:

Not included

Ice Capacity Per 24 Hour Period:

250.0 pounds

Inlet Water Temperature Rating:

70.0 degrees fahrenheit

Product Name:

Ice maker cube

Phase:

Single

Special Features:

Harvest assist provides consistent ice production for the life of the ice maker while reducing energy consumption and increasing capacity; built in antimicrobial protection for the life of the ice maker inhibits bacteria growth on ice maker surfaces; frequency rating-60 hertz; refrigerant-r404a; shipping weight-150lbs; capacity-70degree f air; 50degree f water; 336lbs per hr; 90degree f air/253 lbs per hr

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T235-b
