Mounting Type:

Trailer

End Application:

F-16a/b/c/d

Power Source:

Turbo-generator

Condenser Cooling Type:

Air

Cabinet Material:

Aluminum

Cooling Capacity In Btu Per Hour:

90000.0

Heating Capacity In Btu Per Hour:

160000.0

Special Features:

Environmental limits are minus 66 degrees f to plus 125 degrees f; self contained storage requirement; input requirement is gas turbine driven compressor; direct method of coupling; refrigerant capacity is 10 to 50 lbs air volume; means for air distribution is air ducts; tie down provisions are 4 eyebolts; towing provisions are 2 wheels and drawbar; pneumatic tires; 4 ducts; 8 in. 15 ft hose for coolant connection; body type is all weather box type; t.O. 35e9-90-11

Surface Treatment:

Enamel baked

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A505g0
