Mounting Type:

Trailer

Wheel Quantity:

4

Power Source:

Diesel engine

Condenser Cooling Type:

Air

Compressor Unit Type:

Open

Cooling Capacity In Btu Per Hour:

166000.0

Special Features:

Model no. Of air conditioner is ma-3d; intended for general purpose airconditioning of aircraft avionics compartments during maintenance and preflight periods; cools maintenance shelters, portable hanger, etc.; uses refrigerant r-134a; provides vent air or cool, dehumidified air at a temperature of 50 degrees f; operates on the conventional vapor-compression cycle

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A505g0
