Gas For Which Designed:

Refrigerant r-22

Reciprocating Compressor Design:

Double acting

Rotary Compressor Design:

Axial screw

Prime Mover Type:

Electric motor

Voltage In Volts And Current Type:

115.0 ac

Special Features:

Srotor diameter 127 mm; rotor l/d ratio 1.80; full hermetic female drive compressor; hi temp (m7 to p 10 degrees c); automatic unloaded spring start; vapor refrigerant injection; undersized by 1 step motor; uses vapors r507; r404a; r07c

Frequency In Hertz:

50.0 and 60.0

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A026a0
