Overall Width:

11.25 inches

Body Diameter:

22.25 inches

Body Inside Diameter:

1.25 inches

End Application:

Cps; 6264204

Design Type:

Reusable

Bodylength:

31.00 inches

Filtering Media Design:

Layered single filtering media response

Product Name:

Prefilter, bag, dual ply

Special Features:

Used in general ventilation for removing particulate matter (including water); layers bound together form a pad (internal media) ; stainless steel retaining strip; pull loop sewn into filter

Material:

Polyester filtering medium

Special Test Features:

Air filter media shall be a dual ply, lofted, non-woven, material composed of various denier polyester fibers arranged in a random, air laid configuration. The media shall have two identifiably different layers, bound together with chemical bonding agents forming a pad suitable to be used as an air filter medium

Supplementary Features:

Retaining strip material shall be stainless steel type 301 iaw sae-ams-5517

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A24000
