Gas For Which Designed:

Refrigerant r-22

Cooling System Design:

Single

Compressor Cooling Medium:

Refrigerant

Stage Quantity:

1

Brake Power Required:

460.0 watts

Special Features:

Electrical characteristics 460-3-60; motor protector internal line break; motor type al 3 phase- across the line; family series model a; fourth generation - basic standard model; refrigeration application high temperature

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

A026a0
