Refrigeration Flow Rate In Tons Per Hour:

3.000

Overall Length:

15.625 inches

Overall Width:

13.562 inches

Media For Which Designed:

Water

Water For Which Designed:

Salt or fresh

Tube Fin:

Not provided

Cooling Type:

Water

Special Features:

Coxial tube-in-tube design, matererial cupronickel (75 % copper 25% nickel , water flows through inner tube while refrigerant (r-134a) flows in annulus between the inner and outer tubes

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fig:

T240-a
