Frequency Rating:

60.0 hertz

Voltage Rating:

115.0 volts

Phase:

Single

Special Features:

Designed for opening 4 ft w x 7 ft ht; 1600 fpm air velocity measured at points 3 ft above floor; air intake ports located on both ends and provided w/dampers for velocity control; departure from cited document: as modified by air intake location, intake dampers and elec characteristics

Specification Or Standard:

I type

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A513n0
