Speed Adjustments:

Two speed

Ambient Temperature At Full Rated Power:

65.0 degrees celsius

Electrical Connection Type:

Connector

Drive Type:

Direct

Inclosure Type:

Fully enclosed

Rotation Direction For Which Designed:

Clockwise

Air Flow Rate:

790.0 cubic feet per minute

Prime Mover Drive Shaft Bearing Type:

Ball

Phase:

Three

Material:

Aluminum

Material Specification:

Qqa-596 federal specification single material response

Style Designator:

Fixed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A087a0

Mil-std (military Standard):

Mil-f-18953 spec.
