Diameter:

7.500 inches

Flow Direction:

Outward

End Application:

Boat cabin

Drive Type:

Direct

Prime Mover Type:

Electric motor

Inclosure Type:

Guarded

Mounting Facility Type And Quantity:

1 bracket

Voltage In Volts And Current Type:

12.0 dc

Special Features:

Oscillates 120 degrees horizontally or can be operated from stationary position; vertical adjustment; may be mounted vertically or horizontally; color white with transparent blades, quiet motor draws 1.2 amps

Style Designator:

Fixed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A087a0
