End Application:

Adp processing server a115038-01, virginia class submarine

Static Pressure At Specificationified Air Flow Rate:

100.0 millimeters of water

Drive Type:

Direct

Mounting Facility Type And Quantity:

4 unthreaded hole

Air Flow Rate:

0.3 cubic meters per minute

Product Name:

Fan/dual servr assembly

Special Features:

Drated voltage 12v dc; operating voltage 7v dc to 13.8v dc; rated current 0.24 a maximum at 12v dc; rated speed 8700 min at 12v dc; operating temp range -10c to +70c; sound pressure level 37 db

Material:

Plastic

Style Designator:

Fixed

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

A087a0
