End Application:

Standard terminal automation replacement system (stars)

Product Name:

Fan grill guard

Special Features:

This nsn is for ssm-stams-188, which updates the front door fan assemblies of the g4 equipment racks that have already been deployed, by installing an additional fan blade guard on the fan side that faces the perforated rack front door mounted on the fan assemblies. This grill guard will prevent inadvertent placement of a finger behind the fan assembly, keeping the fan blade from hitting a finger. Sgr-31 is the chrome fan finger grill/guard that fits the fram size of the 80mm square mechatronics uf80a12-bthr fan
