End Application:

A/f32t-9

Design Type:

Stationary

Capacity Rating:

550.0 gallons

Extinguishing Agent For Which Designed:

Bromotrifluoromethane

Supplementary Features:

Cylinder & valve assembly; valve matl: aluminum; cylinder: steel, painted red with white stripe, cylinder to have anti-recoil plug (included with assembly) assembled to discharge outlet when cylinder is not connected to system discharge pipe; capacity 360 psi; min/max fill range:

314-550 lbs; equipped with liquid level indicator

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T278-b
