Container Material:

Steel

End Application:

A/f32t-10/11

Charge Design Type:

Standard

Design Type:

Stationary

Unit Type:

Charged

Capacity Rating:

340.0 gallons

Extinguishing Agent For Which Designed:

Bromotrifluoromethane

Functional Description:

System is designed for storage of agent as a liquid in pressurized containers. Fixed piping transports the agent to nozzle where it vaporizes to provides the required halon 1301 design concentration; module complies with nfp12a-1977; total flooding fixed pipe engineered halon 1301 fire suppression system; tank meets d.O.T. Specifications

Supplementary Features:

Each module contains: tank, siphontube, valve & shipping plug, pressure gauge, pressure relief device, the netquantity of agent and nameplate with amaintenance & recharge instructions

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T278-b
