**Container Material:**

Steel

**End Application:**

A/f32t-10/11

**Charge Design Type:**

Standard

**Design Type:**

Stationary

**Unit Type:**

Charged

**Capacity Rating:**

340.0 gallons

**Extinguishing Agent For Which Designed:**

Bromotrifluoromethane

**Functional Description:**

System is designed for storage of agent as a liquid in pressurized containers. Fixed piping transports the agent to nozzle where it vaporizes to provides the required halon 1301 design concentration; module complies with nfpa12a-1977; total flooding fixed pipe engineered halon 1301 fire suppression system; tank meets d.O.T. Specifications

**Supplementary Features:**

Each module contains: tank, siphontube, valve & shipping plug, pressure gauge, pressure relief device, the netquantity of agent and nameplate with amaintenance & recharge instructions

**Shelf Life:**

N/a

**Unit Of Measure:**

--

**Demilitarization:**

No

**Fiig:**

T278-b
