Extinguisher Size For Which Designed:

Aph 1.5

Product Name:

Kit, proportioning pump

Special Features:

The ap system design diverts 85 gpm of the water pumps output from the discharge side of the pump and sends it through an eductor. A vacuum is created at the eductor's foam concentrate inlet which draws foam concentrate through the metering valve and into the eductor. This foam/water mixture is then sent to the suction side of the water pump where it mixes with the incoming water and is distributed throughout the discharge piping.

Shelf Life:

N/a

Unit Of Measure:

--

Demilitarization:

No

Fiig:

T278-b
