Special Features:

Outside dimensions are 6'6" wide x 12'6" length x 2" height. The width of the pad perimeter wall is three inches. The capture is 6' wide x 12' length. The pad perimeter wall is two inch open cell urethane foam encapsulated in high visibility, durable, yellow vinyl fabric. The encapsulated urethane foam perimeter retains original form after compression. The pad floor is reinforced with a double layer of durable coated vinyl fabric, with the top layer being black in color. For tie down purposes, the spill pad is equipped with one grommet in each corner.
